This program is being organized at CSIR-IICT, Hyderabad with the support from SERB, Govt of India under the KARYASHALA scheme to impart greater awareness about the various Intellectual Property Rights (IPR) and their benefits. This program will cover the aspects of novelty assessment, research ideation and execution through the use of various computational tools and databases (including AI based databases) for patentability assessment and technology forecasting. This program shall also cover patent drafting, patent filing and prosecution process. Expert faculties will also impart the applied aspects of licensing or commercialisation process of technology, know-how or IP and involved legal instruments for the participants. Overall, this two week program shall cater the IP dosing need for R&D beginners and also for those who are looking for their career in IP.
